SUMMARY

AI Engineer (B.Tech CS, 2026) who ships — not just prototypes. Three products are live in production right now: a full-stack RAG assistant with real-time streaming and source citations, a multi-source job-intelligence pipeline with an LLM fit-scoring engine, and **DualDesk**, a native Windows desktop app with real users. Backed by four internships across data engineering, backend systems, and applied GenAI research at IIT Jammu. Looking for an AI Engineer / SWE (AI/ML) seat where shipped, working systems matter more than notebooks.

TECHNICAL SKILLS

AI & GenAI: LangChain, CrewAI (multi-agent systems), OpenAI GPT-4o API, Google Gemini API & Vision, Retrieval-Augmented Generation (RAG), ChromaDB (vector search), Scikit-learn, faster-whisper, NLP

Languages: Python, JavaScript/TypeScript, SQL, C/C++

Full-Stack & Backend: FastAPI, Flask, Next.js, React.js, Node.js, REST APIs, JWT Auth, Tailwind CSS

Data & Cloud: MySQL, PostgreSQL, SQLite, Pandas, AWS, Docker, Oracle Cloud OCI, Vercel, CI/CD

Tools: Git/GitHub, n8n (workflow automation), Electron.js, Selenium, Jupyter

PROFESSIONAL EXPERIENCE

One placeholder left below — name the actual process before sending this out.

Data & IT Engineering Intern — Pancarbo Greenfuels Pvt. Ltd. | Mohali, India | Mar – Jul 2026

- Cut weekly reporting turnaround by **75% (from ~4 hours to ~1 hour)** by engineering automated Python/Pandas ETL pipelines that replaced a fully manual data-consolidation process feeding cloud-hosted MySQL.
- Reduced data-entry errors in reporting by building automated validation checks into the pipeline, improving data reliability for downstream teams.

Software Developer Intern — Cognifyz Technologies | Remote | Jan – Feb 2026

- Shipped **4** REST API endpoints in Python that powered live front-end reporting dashboards, giving the reporting team faster, self-serve access to data.
- Containerized backend services with Docker, enabling consistent, repeatable deployment across dev/staging/prod environments.

AI & GenAI Intern — IIT Jammu, Career Development Services | Jammu, India | Jun – Aug 2025

- Designed LangChain + OpenAI API agent workflows that automated **[institutional process — name it]** under IIT faculty mentorship, replacing a manual step with an LLM-driven pipeline.

Software Engineering Intern — OctaNet Services Pvt. Ltd. | Remote | Jul – Aug 2024

- Resolved **50** front-end bugs and cleaned SQL-based client data across live client web platforms, keeping production stable over an 8-week engagement.

PROJECTS

Enterprise RAG Assistant | Next.js, FastAPI, Python, ChromaDB, SQLite | Live · GitHub

- Engineered a full-stack Retrieval-Augmented Generation assistant — real-time streaming responses, voice synthesis, and a citation-inspector for source verification — deployed live on Vercel (frontend) and Render (backend).
- Built the retrieval layer with FastAPI, ChromaDB vector search, and SQLite persistence for fast, source-grounded answers.

AI Job Intelligence Dashboard | Next.js, TypeScript, Gemini API, n8n | Live · GitHub

- Built a multi-source job-scraping pipeline (LinkedIn, Indeed, Naukri, Internshala) orchestrated via n8n, feeding a Gemini-powered fit-score engine that ranks listings against a candidate profile.
- Automated tailored cover-letter and interview-prep generation inside a 4-stage application tracker (Saved → Applied → Interviewing → Offer), deployed live on Vercel.

BioPulse Elite — AI Industrial Dashboard | Python, Flask, React, Scikit-learn, GPT-4o, Docker | GitHub

- Delivered real-time equipment-status predictions every 5 seconds by integrating 5 production ML models (ANN, 98.39% accuracy) into a full-stack platform via a Flask REST API.
- Replaced manual dispatch coordination with a GPT-4o conversational interface and fleet-route optimizer, turning raw sensor data into natural-language system insights.

GharSuraksha — AI Home Inventory & Insurance Intelligence | React, Next.js, Gemini Vision AI, Tailwind CSS | Live

- Cut insurance-claim prep time by over 80% by building an AI platform that catalogs 400+ home items from photos using Gemini Vision and auto-estimates replacement values.
- Flags coverage gaps by cross-referencing the generated inventory against uploaded policy documents, giving users actionable protection insights.

EDUCATION & CERTIFICATIONS

B.Tech, Computer Science Engineering — Amity University, Mohali | 2022 – 2026

CGPA: 7.18 / 10

Certifications: AWS Certified Data Engineer – Associate · Oracle Cloud OCI Associate · AI Agents Certification (IIT Jammu) — full list on LinkedIn
